

Demonstration of Proposed Features

Date	5 July 2026
Team ID	SWTID-2026-2638
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Environment Setup & Dependency Configuration	Configured Python 3.11+, React.js (Vite), FastAPI, SQLite, SQLAlchemy and Google Gemini API.	Implemented	Yes	All dependencies installed and project structure configured.
2	AI Integration & Financial Processing	Implemented AI modules: financial health, debt-to-income analysis, settlement prediction, AI negotiation strategies and letter generation.	Implemented	Yes	Gemini AI integrated successfully.
3	Core Backend Development	Developed FastAPI services for authentication, user management, loan management, financial analysis and settlement prediction.	Implemented	Yes	All APIs tested and working as expected.
4	Database Management & Data Persistence	Implemented database storage for users, loans, settlement records and AI-generated history.	Implemented	Yes	SQLite database with SQLAlchemy ORM implemented.
5	Frontend User Interface Development	Created responsive UI with login & registration, financial dashboard, settlement predictor and AI letter generator.	Implemented	Yes	All pages designed and functional.
6	Testing, Optimization & Deployment	Performed testing, optimization, security validation and deployment preparation.	Partial	Yes	Testing completed. Deployment in progress.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	5
Total Features Demonstrated	5
Overall Implementation Rate (%)	83.33%
